Day 4-5 Weather Hazards

Valid: 0800 Tue - 0800 Thu

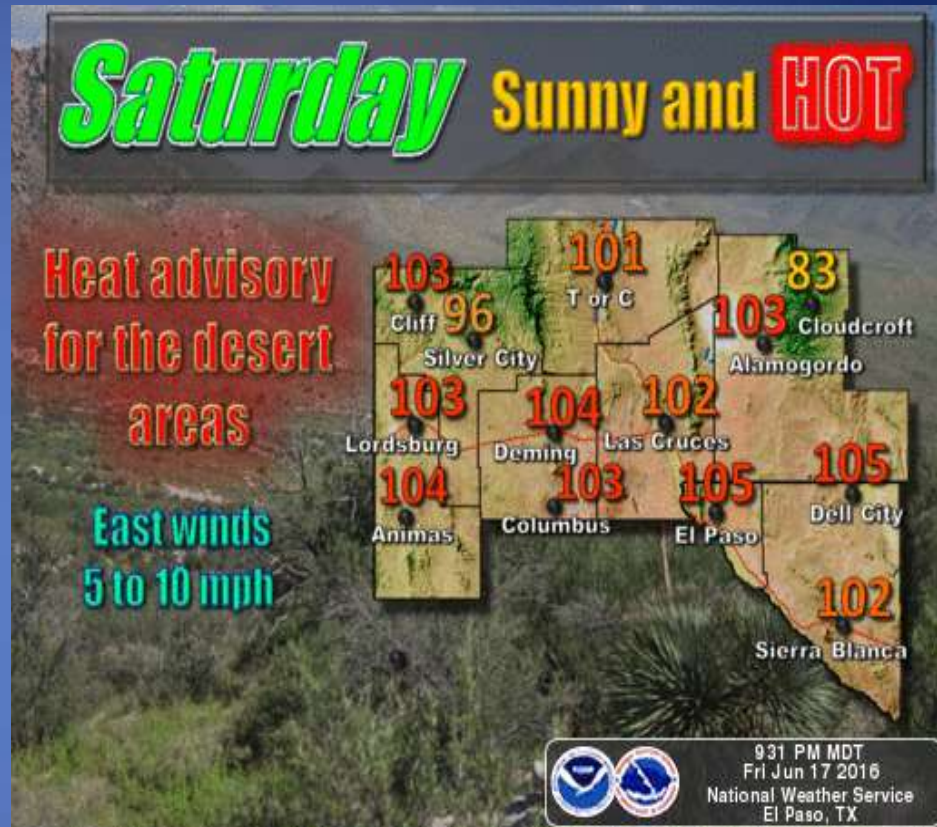

# Hazardous Weather

It will be hot again today as an upper level ridge hovers near the region. High temperatures will be near 100 degrees in the mountains, and between 105-110 along the Pecos and Rio Grande Rivers. Therefore, a Heat Advisory is in effect for these areas this afternoon and early evening. Temperatures will range from 95-105 over the Permian Basin. Those planning outdoor activity are urged to take frequent breaks from the sun, and drink plenty of water.

High pressure aloft will continue over New Mexico Saturday. With plenty of sunshine over the last several days, heat has been building up. High temperatures Saturday will likely be the hottest so far this summer, some 10 degrees above normal. Because of this, a heat advisory is in effect for most of the desert locations. The good news is the heat should moderate some the next several days after Saturday.
